🗐 References

This repository was created as part of the **Mastercard Cybersecurity Job Simulation** on Forage. The tasks documented here focus on:

- Designing and running a phishing email simulation campaign
- Analyzing results to identify at-risk departments
- Developing targeted cybersecurity awareness training programs

You can explore the original job simulation tasks here:

- 🔗 Design a Phishing Email Simulation
- 🔗 Interpret Phishing Simulation Results

This simulation experience is part of Mastercard's initiative to develop real-world cybersecurity skills and strategic awareness in the workplace.
